LUXER ONE

SMART LOCKER SOLUTIONS FOR UNIVERSITIES

THE CHALLENGES

Universities are faced with managing a growing volume of packages and shared resources for students and faculty. As delivery demand increases and staffing and space remain limited, campuses struggle to keep items secure while maintaining convenient access.

Whether it's student deliveries, library materials, or campus store orders, traditional pickup and exchange processes often create delays, limit availability, and add strain on campus staff.

THE SOLUTION

Luxer One smart lockers help universities simplify how items are stored, accessed, and exchanged across campus. By automating pickups and handoffs, campuses can reduce manual workload, make better use of staff time, and provide reliable access to items beyond traditional service hours.

The result is a more efficient operation, a better experience for students and faculty, and a campus environment designed for secure, self-service access.

LUXER ONE OFFERS:
